Professional Summary

Quality Engineer with 1+ year of experience in test automation, API testing, and system testing for web applications. Strong expertise in Java, Selenium WebDriver, TestNG, REST Assured, Jenkins, and Agile methodologies. Experienced in building automation frameworks, executing QE test strategies, and leveraging GenAI tools to improve productivity and code quality.

Professional Experience

Cognizant, Kochi

Oct 2024 - Present

Quality Engineer (Junior SDET)

- Developed and executed QE test plans and test cases for web and API features, covering functional, system, integration, and exploratory testing.
- Designed and maintained automation frameworks using Java, Selenium WebDriver, TestNG, and Cucumber, ensuring scalability and long-term maintainability.
- Automated critical UI and API workflows using Selenium, REST Assured, Postman, and ReadyAPI (SoapUI), reducing manual regression effort by 35 - 40% and improving release stability.
- Collaborated closely with developers and product owners in an Agile environment, actively participating in all Agile ceremonies including sprint planning, daily stand-ups, sprint reviews, and retrospectives to clarify requirements, resolve defects, and support continuous delivery.
- Integrated automated tests with Jenkins CI/CD, tracked test progress and defects in JIRA, and consistently delivered high-quality releases under tight timelines.

Skills

Programming Languages: Java, JavaScript, C, Python

Test Automation: Selenium WebDriver, TestNG, Cucumber (BDD)

API Testing: REST Assured, Postman, ReadyAPI (SOAPUI)

CI/CD & DevOps: Jenkins, Git, GitHub, Maven

Test Management & Tracking: JIRA, defect lifecycle management, test execution tracking

Databases: MySQL, PostgreSQL (data validation and queries),

Testing Types: Smoke, Regression, Functional, System, Integration, Exploratory, Negative Testing

Methodologies: Agile / Scrum

AI / GenAI Exposure: Test case creation, automation scripting, debugging support, test documentation

Education

B.Tech in Computer Science and Engineering

Nov 2020 - Jun 2024

APJ Abdul Kalam Technological University

CGPA: 7.69

LBS College of Engineering, Kasaragod

Academic Projects

Flipkart UI Automation Framework

Duration: 2 months

Role: Test Automation Engineer

Team Size: 1

- Developed an individual end-to-end UI automation framework for the Flipkart e-commerce website using Selenium with Java, implementing Page Object Model (POM) to automate critical user flows such as search, product listing, and cart, reducing repetitive manual testing effort.

Respiratory Sound Analysis for the detection of COPD

Duration: 8 months

Role: Comparative Analysis between the Machine Learning techniques.

Team Size: 4

- Developed a machine learning-based web application for the analysis of respiratory sound patterns to aid in the early detection of Chronic Obstructive Pulmonary Disease (COPD) and other lung diseases.
